## Basic Implant Placement Course

Dental implantation is a popular dental procedure used to replace missing teeth. The use of dental implants has become increasingly popular over the past few years. With the increase in demand, there has been a need for dental professionals to be trained in the procedure.

Global Implant Academy offers a Basic Hands-On Dental Implant Course to train dental professionals on dental implant placement.

This 48 hours CPD course meets the criteria for the GDC development outcomes A & C and is subject to quality assurance by Clinical Director Roshith Valiyamannil (GDC number 155938) BDS, MDS, MFDS, Dip Implant (CADI, Cambridge) PDip in Implants and SAAD

Basic Implant  
Placement  
Course

As a part of our Basic Hands-On Dental Implant Course, we are proud to offer an opportunity for prospective dentists to gain practical experience in dental implant placement by placing 20 dental implants on live patients in India within just 5 days. Each candidate will also have one case of soft and hard tissue grafting.

This experience will provide invaluable hands-on training and enable participants to apply the skills they have learned in a real-world setting.
